OBJECTIVE

A third-semester Informatics student with a strong interest in software development, particularly in designing websites and applications that are both visually appealing and user-friendly. I am passionate about web development and currently expanding my skills in React and Tailwind CSS. I strive to apply what I have learned at university while further developing my technical and teamwork skills in a professional environment.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Jakarta

Jakarta, Indonesia

Bachelor's Degree of Computer Science, Informatics

2024 – Present

Cumulative GPA : 3.92 / 4.0

EXPERIENCES

KSM Android | *Member*

November 2024 – Present

- Learned about UI/UX design and front-end development with guidance from mentors.
- Gained hands-on experience in creating interactive and goal-oriented websites and mobile applications.
- Explored how to design and develop digital products that effectively communicate their purpose to users.

Learn with Android | *Head of PDD Division*

October 2025 – Present

- Led the Public Relations, Documentation, and Design (PDD) division to create engaging designs and content for events.
- Organized and guided a creative team to produce visual materials that attract audience attention.
- Coordinated with multiple divisions to align on a shared vision for the event.

Palang Merah Remaja | *Head of HPD Division*

August 2021 – August 2023

- Organized and facilitated design needs for other members and published monthly organizational activities.
- Managed communication with alumni and maintained good relations during special events.
- Strengthened teamwork and creativity within the division to support social and humanitarian activities.

PROJECTS

Lunaria E-Commerce | [Project Link](#)

October 2025

- Developed a full-stack web application using Next.js (React framework) and Express.js within a monorepo architecture, showcasing proficiency in modern web development with a focus on responsive and user-friendly design.
- Implemented RESTful APIs and managed data flow between frontend and backend components to enable dynamic content rendering and smooth user interactions.
- Utilized Tailwind CSS for efficient and consistent styling, and deployed the application on Vercel to ensure scalability, performance optimization, and a seamless user experience.

Virtual Pet | [Project Link](#)

June 2025

- Developed a console-based virtual pet simulation game using C++, implementing object-oriented programming principles such as classes, inheritance, and modular design.
- Designed and managed core gameplay features including pet status management, world interaction, activity systems, inventory handling, save/load functionality, and leaderboard tracking.
- Applied structured programming and file handling to create an interactive user experience and persistent game progress through text-based data storage.

HONORS & CERTIFICATES

UI/UX Basic Study Club | KSM Android

December 2024

- Gained foundational knowledge of UI/UX principles, including design thinking, empathy mapping, and the UX design process from ideation to prototyping.
- Learned to use Figma for creating low-fidelity and mid-fidelity wireframes, applying Laws of UX and effective call-to-action techniques in interface design.

UI/UX Beginner Study Club | KSM Android

June 2025

- Strengthened practical design skills using advanced Figma techniques such as components, variants, auto layout, and design systems for creating complex and interactive interfaces.
- Applied prototyping, usability testing, and developer collaboration workflows to produce high-fidelity, interactive designs aligned with real-world development practices.

SKILLS

Programming Languages : HTML, CSS, JavaScript, C, C++, Java

Framework & Libraries : React.js, Next.js, Express.js, Tailwind CSS

Database : MySQL, MongoDB

Developer Tools : Figma, Git, GitHub, Node.js

Soft Skills : Adaptability, Problem Solving, Communication, Leadership, Attention to Detail, Creativity, Time Management

Languages : Indonesian (Native), English
